

Head Start Machine Learning

Session 2: Python Libraries

Lew Jun Bin
Year 2 CS(SE)

Chin Qi Xiang
Year 2 CS(AI)

```
def filterStudies(studies, filterByOrg, filterByStatus):  
    filteredStudies = []  
    for study in studies:  
        if (filterByOrg == study.lead_organization or filterByOrg == None) and  
            (filterByStatus == study.status or filterByStatus == None):  
            filteredStudies.append(study)  
    return filteredStudies
```

What is Colab?

Attendance

- > Select Tab “Head Start Machine Learning”
- > Mark your attendance by inserting “1”
- > Do it within this 2 hours

What is Colab?

What you will learn....

- Python Basics
- NumPy
- Matplotlib
- Pandas
- Hands-on session

Drop your question in the chat box if you don't understand anything!
